מצוף דגם JK-M15-3

DETAILS

Performance And Characteristics:

1. Simple Construction, Reliable Performance.
The product can output stable and reliable switch control signal of making/breaking without any fault action, so its reliability is very high and ant-interference is strong.
2. Sturdy and Durable, Need no Maintenance.
The product can be used for a long time after it being installed. Almost no maintenance and repairing problem would occur during its operation period.
3. Easy Installation Method, Convenient Adjustment Method.
The liquid level control scope can be adjusted at will with the locating piece moving up and down. Only one screw is needed to secure the signal cable to finish installation.
4. Wide Application Scope, Strong Generality. The product applicable to branch water, sewage, acid-based solution of less than medium concentration, oils and situations requiring no pollution, diesel oil gasification kitchen range, and automatic fuel feeding.
5. Simple Circuit, Economical and Practical.
6. Technical Data:
 - Microswitch: 10(8)A 250v~10(4)A 380v
 - Switch currency: 50 000 switch workings tested by VDE specification.
 - Protective connection: T 70U
 - Protection: Waterproof
 - Max. temperature: 70 C
 - Working Pressure: Max.1 bar
 - Circuit breaking capacity: directly KW with 250V
